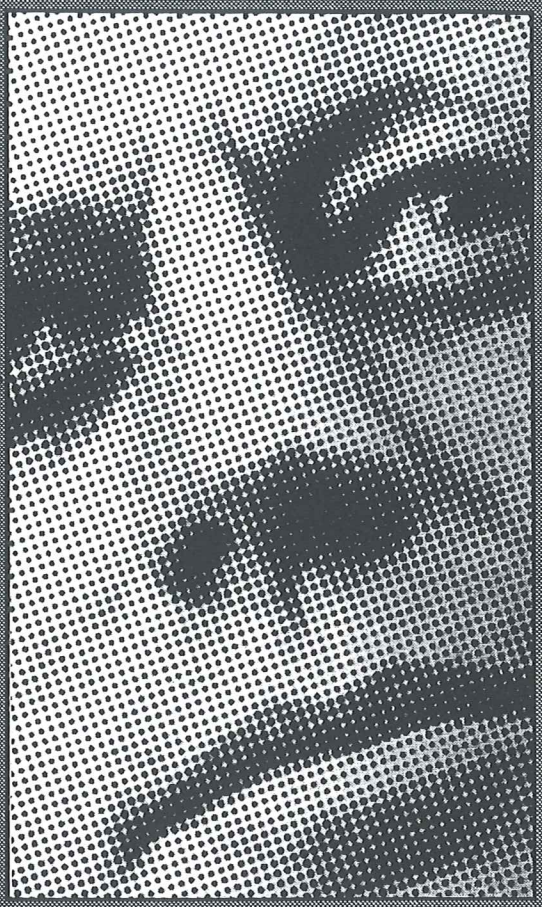
JFK:

The cover-up continues



Why Oliver Stone's controversial film has drawn so much fire and how the cover-up of the assassination of John F. Kennedy continues.

Hear:

Hal Verb

Free-lance writer of many articles on the Kennedy assassination; teacher of a class at S.F. State entitled: "An Examination of the John F. Kennedy Assassination." Verb was the first to show the Zapruder film and his research findings were used by author Harold Weisberg in his books "Whitewash" and "Oswald in New Orleans." He also uncovered documents that proved Jack Ruby was an FBI informant.
